

# New Zealand Prescribers,

We’ve introduced some changes on the Add Medication page.

## Frequency

This field has been renamed to be clearer and aligned with industry standard.

## Instructions

Automatically generated from dosage, time, route, and frequency. This assists with charting checks.

## Indication for charting

This field has been renamed. This is what the nurse or carer sees in the administration page when giving the medication.

## Reason for prescribing

This field has been renamed. This is the clinical rationale to explain why the prescriber decided the resident should have the medication.
